

Israel's Annual Report for 2023 on Trade in Species Listed in the Appendices of
The Convention on International Trade in Endangered Species
of Wild Flora and Fauna (CITES)

Prepared by:

Simon C. Nemtzov for Israel's Scientific Authority, simon@npa.org.il

and Eti Sabag for Israel's Management Authority, u.achifa@npa.org.il

Introduction

This report consists of two tables of data from Israel on imports (Pages 8-11) and exports/re-exports (Pages 12-17) of species listed in the Appendices of the CITES convention, that were issued in the year 2023, prepared in accordance with Article VIII, paragraph 7 (a) of the Convention, following the Guidelines for the Preparation and Submission of CITES Annual Reports (version February 2025).

Israel's trade policy necessitates an import and export permit from the Israel Nature and Parks Authority (INPA) for all wildlife, and for all protected species imported into the country (even non-CITES-listed species). In addition, the INPA issues official CITES permits for the import of CITES Appendix-I listed species, and for the export or re-export of all CITES-listed species.

Israel also has certain stricter domestic measures regarding trade in wild flora and fauna, and these were updated in 2019 and disseminated to the Parties in CITES Notification No. 2019/043 from 13 August 2019.

This annual summary consists of data on the actual quantity of specimens imported and exported (except for corals and flora, see below). The data in the tables were provided by the permit-holders and were approved by INPA inspectors.

Imports

The table of Import Permits (Pages 8-11) includes all permits issued for the import to Israel of CITES-listed species for which specimens were actually imported; however, the quantity of the live Flora (plants) and corals for Commercial purposes (code T) in the table is not always known and in those cases the quantity listed is the quantity that was approved in the application for the permit. The table includes a description (using the description codes in the aforementioned Guidelines, see page 5 of this report), the quantity actually imported, the ISO code for the country of export (the country exporting to Israel), the number of the Israeli import permit issued by the INPA, and for Appendix-I species also the codes used for the Purpose and Source (described on Pages 6-7 of this report).

Note: Purpose and Source codes (described on Pages 6-7) are provided only for import permits for species listed in Appendix I.

Note: Even where no source code is listed, it is import to note that Israel does not generally allow any import of wild-caught specimens, this according to Israel's trade policy and its stricter domestic measures, in accordance with Article XIV Paragraph 1 of the Convention, as detailed in CITES Notification No. 2019/043 from 13 August 2019, entitled "Israel: Stricter domestic measures concerning import and export of wild fauna and flora".

Exports and Re-exports

The table of Export and Re-export Permits (Pages 12-17) includes all permits and pre-convention certificates issued for the export or re-export from Israel of CITES-listed species for which specimens were actually exported or re-

exported. The table includes the CITES description code (following the Guidelines, see page 5), the quantity exported or re-exported, the ISO code of the destination country, the number of the Israeli export or re-export permit or pre-convention certificate (identified as those specimens with source code O), the ISO code of the country of origin of re-exports (which in most cases is the country of last export), and the Purpose and Source codes (described on Pages 6-7).

Note: Re-export permits have a country listed in the column "Country of origin of re-exports"; for all Export permits this column is left blank.

Language:

This report was written and submitted to the CITES Secretariat in English, in accordance with the Guidelines for the Preparation and Submission of CITES Annual Reports (February 2025), which require the report to be in one of the three official languages of the Convention.

**Explanation of the Description Trade Term Codes that appear in the tables of this
report, taken from:**

Guidelines for the Preparation and Submission of CITES Annual Reports (February 2025)

CAV	Caviar
COR	Corals
COS	Cosmetics
EXT	Extract
HAI	Hair
JWL	Jewellery
LIV	Live
LPS	Leather product, small
MEA	Meat
ROO	Roots or bulbs
SKU	Skull
SPE	Biological specimen (e.g. blood, plasma, semen)

CITES Purpose and Source Codes

- Codes for the Source of specimens in trade, taken from Resolution Conf. 12.3 (Rev. CoP19)

Source Code	Explanation
X	Specimens taken in “the marine environment not under the jurisdiction of any State”.
R	Ranched specimens: specimens of animals reared in a controlled environment, taken as eggs or juveniles from the wild, where they would otherwise have had a very low probability of surviving to adulthood.
D	Appendix-I animals bred in captivity for commercial purposes in operations included in the Secretariat's Register, in accordance with Resolution Conf. 12.10 (Rev. CoP15), and Appendix-I plants artificially propagated for commercial purposes, as well as parts and derivatives thereof, exported under the provisions of Article VII, paragraph 4, of the Convention.
A	Plants that are artificially propagated in accordance with Resolution Conf. 11.11 (Rev. CoP18), as well as parts and derivatives thereof, exported under the provisions of Article VII, paragraph 5 (specimens of species included in Appendix I that have been propagated artificially for non-commercial purposes and specimens of species included in Appendices II and III).
C	Animals bred in captivity in accordance with Resolution Conf. 10.16 (Rev. CoP19) 1, as well as parts and derivatives thereof, exported under the provisions of Article VII, paragraph 5.
F	Animals born in captivity (F1 or subsequent generations) that do not fulfil the definition of ‘bred in captivity’ in Resolution Conf. 10.16 (Rev. CoP19), as well as parts and derivatives thereof.
Y	Specimens of plants that fulfil the definition for ‘assisted production’ in Resolution Conf. 11.11 (Rev. CoP18) as well as parts and derivatives thereof.
U	Source unknown (must be justified).
I	Confiscated or seized specimens.
O	Pre-Convention specimens.

2. Codes for the Purpose of the trade, taken from Resolution Conf. 12.3 (Rev. CoP19)

Purpose Code	Description
B	Breeding in captivity or artificial propagation
E	Educational
G	Botanical garden
H	Hunting trophy
L	Law enforcement / judicial / forensic
M	Medical (including biomedical research)
N	Reintroduction or introduction into the wild
P	Personal
Q	Circus or traveling exhibition
S	Scientific
T	Commercial
Z	Zoo
